

MD-3010 Ground Searching Metal Detector

Function and characteristics:

With this powerful and versatile device, you can hunt for coins, relics, jewelry, gold, and silver just about anywhere.

- **Fully Automatic and All-Metal Detector:** MD-3010 detects all kinds of metal objects. Unless you have set for some objects that you don't want to detect.
- **Target Identity:** The detected objects are shown on the LCD display. You can decide immediately if the objects worth to be recovered.
- **Unwanted Target Elimination:** You can set the detector not to respond to some objects.
- **Target Depth Indication:** Besides telling you the target ID, the detector also tell you how deep the object was buried.
- **Unique Tone for Target:** You don't have to keep watching the LCD display. When an object is being detected, a unique tone corresponding to a target will generate. You may even searching when there is little or no light.
- **No Clumsy Slack Cable:** Hidden search coil cable (connecting between control unit and search coil) avoid entangling and for ease of stem length adjustment.
- **Headphone Jack:** Provided for headphone connection. Both stereo or mono headphone can be used.
- **Volume Control:** for adjusting the output volume to the loud speaker or headphone.
- **Batteries Condition Indicator:** Shows the conditions of the batteries in the battery compartment.
- **Waterproof Search Coil:** Lets you use the detector in the shallow water.
- **Adjustable Stem:** Lets you adjust the detector's length for comfortable use.
- **Power:** Only two 9-volt batteries are required. Built-in DC-DC converter for prolonging the battery life.

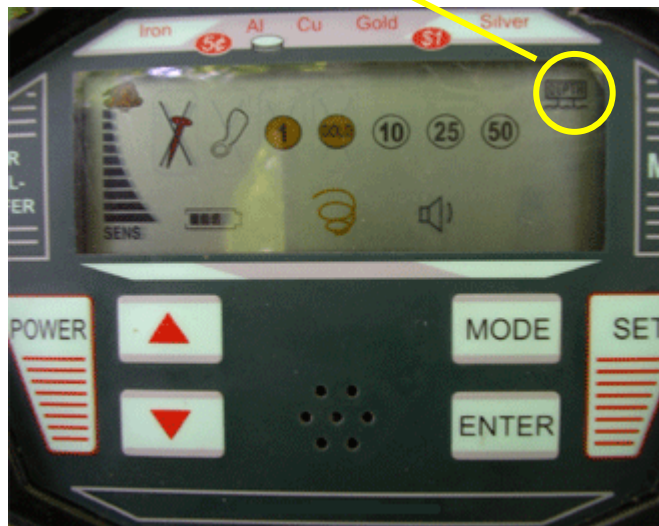

Instrument is intended for finding of **black, color metals (including gilded and nuggets)**, based in the soil at depth up to 200 cm for big objects, also based in water at depth up to 40 cm.

* **The identification of discovered purposes is pointed by icons at the display. Display has 8 sections to visualization of discovered objects, such as: nails, stoppers, coins, gold, cola and etc.**

Instrument duplicates a discovered purpose by a signal, which you may install on your taste (there are 8 different bleeps in the instrument).

* **Color display has a pointer of depth of found discovered purposes.**

Technical Specification:

- Battery: 2*9V
 Type: 6F22
 S006P
 or equivalent
- Operating current: STANDBY-30mA MAX-60mA
- Operating voltage range: 7.1-9.6v
- Operating frequency: 7.5KHz +/- 1KHz
- Sensitivity: Min.13cm (Test Coin: US25 cent)
- Size: 550mm(L)*355mm(W)*153mm(H)
- Gross weight: 3Kg
- Net weight: 1.37Kg
- Packing: 4pcs/CTN
